

AA-77
Thomas Pumphrey House
Glen Burnie
Private

built 1863

The Thomas Pumphrey House is an example of a mid-19th century, Greek Revival Style, center-hall plan dwelling. Both its stylistic embellishment and floor plan representative its period of construction. This type of dwelling is a common on both a local and national level.

The house was built by Thomas Pumphrey (1824-1894), a member of a large and prosperous family who settled in north Anne Arundel County in the second half of the 18th century. Pumphrey was a very successful truck farmer and this house represents the architectural predilection of a wealthy, mid-to-late 19th century Anne Arundel County farmer.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Thomas Pumphrey House, built in 1863, is in an advanced state of deterioration. It has been subject to fire and vandalism, and is presently unsecured.

The two-and-a-half story, five-bay, south-facing dwelling is constructed of brick laid in 5:1 American Bond. The center passage, single-pile plan front block is augmented by a three bay rear ell that projects from the north side. This arrangement gives the building an L-shaped plan. Originally, the slate-covered gable roof was pierced by two corbelled, interior end chimneys, and four (two in each side of the roof) gable-roofed dormers with partial returns. Portions of one chimney have fallen and a front dormer is now missing. A corbelled brick cornice embellishes the otherwise plain roofline.

The badly damaged windows are six-over-six, double-hung sash types with jack arches above and wood sills below each opening. The centrally placed front entrance had a multi-paned transom and sidelights. These are missing, but a paneled casing and molded crown, remain intact. Three other entrances are present. A rear entry, in direct line with the previously described opening, is removed of both its door and casing. The two remaining doorways are in the ell and are positioned in direct alignment with each other. That in the east wall has lost its door, but the casing, much simpler than that in front, remains. A badly deteriorated paneled doors survives in the ell's west wall. All doorways are topped by a jack arch, identical to those over the windows.

The building's interior is extensively damaged. Prominent architectural elements, including mantles, window surrounds, balustrade and newel post have been removed.* Plaster has fallen exposing the brick. Surviving elements of the open string staircase include open stringer brackets with vertical panels below. A steep, narrow winder staircase is located in the rear of the house. This is badly charred balustrade and rail is missing.

Local historian Ora Pumphrey Smith provided Anne Arundel County's, Department of Planning and Code Enforcement with several historic photographs. These photographs depict the building's exterior condition in the early 20th century and will be useful references in any future restoration projects.

* Concern over the building's decay prompted Dr. Stephen Hittle to remove and store these elements. Dr. Hittle lives at the Robinson House (AA-130), 343 Baltimore Annapolis Boulevard; Severna Park, Maryland 21146.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Thomas Pumphrey House was constructed in 1863 and represents the architectural predilection of a wealthy Anne Arundel County truck farmer. Its vernacular Greek Revival styling is typical of the period, and its large size and brick construction are evidence of Thomas Pumphrey's affluence.

Thomas Pumphrey (1824 - 1894) was a member of a large and prosperous family who settled in north Anne Arundel County in the second half of the eighteenth century. Thomas lived on a truck farm adjacent to those of his younger brothers Charles (AA-1073) and Nathan, of whom controlled hundreds of acres. According to the agricultural census, Thomas owned approximately 600 acres, 300 of which were improved. His farm was valued at \$29,000, which is the third highest assessment in the 5th election district of Anne Arundel County in that year (1).

By the middle of the nineteenth century agricultural production in north county had shifted from tobacco, grain, and cereals crops, to truck farming. This form of agriculture focused on growing fresh fruits and vegetables, e.g. strawberries, cantaloupes, stringbeans, etc. for shipment to regional market centers. North Anne Arundel County was favored with sandy soil and an established railroad system, a combination of conditions especially suited to truck farming.

Thomas Pumphrey's success is manifested in the elegant Greek Revival house that he built in 1863 (2). This building, which replaced a frame dwelling that burned, is reflective of the architectural taste of the period, and represents the living style of one of north Anne Arundel County's most successful farmers in the third quarter of the nineteenth century.
